

Module 5c: Reflective log

The TSM Toolkit is a reflective process. Your understanding and thinking about its key themes and ideas are going to grow as you work through the modules. You don't have to share this log or write a lot, it is just a tool to help you reflect on everything from the session. It can be rough notes, bullet points, diagrams, a voice note or however you like to record your thoughts.

What was it like giving co-creators free rein to come up with ideas for their intervention?

What was it like working with the museum designer[s]?

Is there anything else that you're thinking about?
